Inquiries on Dropull’s states of Liminality

A Project of the Joint International PhD Program IDAUP
POLIS University Albania / University of Ferrara Italy
ISBN / 978-9928-4459-8-8 (OMB series) / 978-9928-347-01-5 (V.6)
Published by /POLIS Press, December 2020, Tirana Albania
A project of the International Doctorate Program in Architecture and Urban Planning (IDAUP). POLIS University, Albania / University of Ferrara, Department of Architecture DA, Italy

Editors / Prof.Dr. Besnik Aliaj, Dr. Loris Rossi, Doc.Dr. Sotir Dhamo
Besnik Aliaj, Loris Rossi and Sotir Dhamo are the scientific responsible of the PhD Program workshop organized in the frame of the IDAUP - International Doctorate Program in Architecture and Urban Planning – between POLIS University of Tirana Albania, and the Department of Architecture of Ferrara University, Italy. The publication collects practical and theoretical experiences elaborated within the context of the “Scientific Research Department” and “Applied Research Department”, and the research unit “Observatory of the Mediterranean Basin” (OMB). In this publication Besnik Aliaj, Loris Rossi and Sotir Dhamo have also contributed in terms of contents and introduction, including interventions in some chapters, conclusions and in the elaboration of the index structure.

Scientific Committee of the OMB 6th issue, 2020
POLIS University / Prof.Dr. Besnik Aliaj, Dr. Loris Rossi, Doc.Dr. Sotir Dhamo, Dr. Llazar Kumaraku, Dr. Rudina Toto, Dr. Skender Luarasi

DA University of Ferrara / Prof.Dr. Roberto Di Giulio, Prof.Dr. Theo Zaffagnini Marcello Balzani, Riccardo Dalla Negra, Giacomo Bizzarri, Veronica Dal Buono, Rita Fabbr, Romeo Farinella, Manuela Incerti, Gabriele Lelli, Federica Maietti, Vincenzo Mallardo, Nicola Marzot, Giuseppe Mincolelli, Andrea Rinaldi, Dario Scodeller, Antonello Stella, Michela Maria Toni

International Reviewers of the Issue / Prof.Dr. Pantelis Skayannis (University of Thessaly), Prof.Dr. Anastasios Tellios (University of Thessaloniki), Greece.
OMB Issue Editorial Board / Besnik Aliaj (Editor-in chief), Loris Rossi, Laura Pedata, Llazar Kumaraku

OMB Issue Academic & Linguistic Reviewer / Skender Luarasi
Layout & Design / Besjana Qaja
English Editing / Laura Pedata

Note / The book has been revised by an external international peer-reviewed. The chapter 4 collects the IDAUP PhD researchers’ contributions, which have undergone a process of double-blind review. All the contributions of this book have adopted the Harvard Quote System. The OMB series book is normally deposited in the Library of Congress, Washington D.C., U.S.A. https://catalog.loc.gov/
This is a strategy for preservation and renovation of Dervician housing stock. Dervician is a rural village with a strong historical value. It is possible recognize in it different aspects that represent a great potential, but the lack of connection and valorisation between the different parts is leading the village to depopulation and architectural decay. In this situation, the idea that emerged during the workshop was to find the main strengths and vulnerabilities of the village, identify where the historical and cultural aspects were already integrated, even if not valorised, and where the connection is lacking.

'Re-connection' is the project key word.

The project performs an analysis of several aspects, according to restoration requirements, according to which no intervention can be realised without a precise historical and material knowledge of the object, both in the case of buildings and urban tissue. Therefore, three different types of settlements have been identified, two historical settlements and a contemporary one. They both contrast and merge with one another. A second field of analysis concerns the social issues. There is a lack of social identity in Dervician accompanied with the abandonment of houses.

There are three main directions of intervention: First, there is a need to develop guidelines of town planning and development in a detailed level, such as: what intervention should be allowed in the historic part of the town; where new houses can be built; what kind of housing typology should be designed and built; what kind of materials should be used; how the old houses can be restored; how the streets should be paved; and what kind of greenery should be planted.

Second, local administration should be trained and stimulated to stay in Dervician. There is a risk, as in other towns, that when students go to study in the main cities, they end up staying there and don’t go back to their hometown. Therefore, in town job training associated with some small incentives may give better results.

Last, but not least, the use existing national programs like “Urban renaissance” for investing and improving the centre of the towns, and housing programs like “improving living conditions of poor and vulnerable groups” are a priority.

Finally, the project consists of an analysis of the typological, architectural and constructive features, with the aim to recognise the specific buildings characteristics that should be preserved. Thus, while from a typological point of view, two different types of residential buildings have been identified, several architectural features that represent an historical value and are typical of the border between Greece and Albania, have been detected.
**Typological distinctive features**

- **three floors houses**
- **pantola with wino**
- **enclosure**
- **one floor houses**
- **enclosure**

**Architectural distinctive features**

- **local stone roof**
- **tipical entrance**
- **cobblestones**
- **cornice**
- **windows**

---

** HOW TO:**

- **Reinforce relationship between historical village and the “soviet” village**
  - Join the Historical the “Soviet” village in a pedestrian route inside Dervaçian that guides tourists in discovery of the different historical moments the different soul of the village

- **Restore or improve structural consistency**
  - *Diagnosis and site investigation*
  - *Maintenance*
  - *Apply Traditional methods*
  - *Be reversible, if technically possible (ICOMOS)*
  - *Modern specialized technologies*

- **Create relationship between historical village and the new expansion**
  - Regulate the morphological aspects of the planning:
    - a) to PLAN the growth
    - b) to ADAPT the planning to the terrain model
  - In the mountain use the Organic Pattern according to the ancient roots (reinforcing them if necessary)
  - Respect the social planned path of the field where present

- **Don’t push down the historic city by too high building**
  - Design the new building respecting the historical materials and typological and constructive characters WITHOUT INITIATING BUT PICKING THEM IN A CONTEMPORARY KEY

- **Join the Historical the “Soviet” village in a pedestrian route inside Dervaçian that guides tourists in discovery of the different historical moments the different soul of the village**
  - Reuse the abandoned houses with new functions connected to tourism, trekking and local products.
